

Tottenham Transport Investment

The Council is investing in traffic calming works on the residential roads within the Tottenham Gyratory. These works, to be undertaken between 2012 and 2014, would complement the major works by delivered by TfL on the gyratory [Monument Way, Broad Lane and Tottenham High Road]. These are planned to commence in 2012 and complete in 2014.

We have completed a major enhancement to Tottenham High Road. Works delivered included

- replacement of footways;
- upgrades to street lighting;
- side road entry treatments;
- reduced street clutter;
- cycle facilities such as advanced stop lines;
- pedestrian crossing enhancements;
- and bus stop accessibility improvements.

The scheme finished in 2009 and cost in excess of £2m.
