<https://haringeyclimateforum.org/about-us/>

The **Haringey Climate Forum (HCF)** was set up in 2011, when the climate emergency seemed in the distant future. It hoped to bring together all the Communities in Haringey to provide an independent voice from residents to the Council.

**HCF needs:** Steering Group Members (spec at link above) and hands on help to keep the web site up to date, recruit more community groups, organise events and social media. Contact [info@haringeyclimateforum.org](mailto:info@haringeyclimateforum.org)

<https://sustainableharingey.wordpress.com/>

**Sustainable Haringey** was set up in 2007. It has a **General mailing list** for Monthly Mailing about forthcoming events and activities and an **Activists List** for a mailing group to **share information about environmental events and activities in Haringey.**

**Sustainable Haringey needs:** help to manage the collection of information and getting it out to members. Contact [info@SustainableHaringey.org.uk](mailto:info@SustainableHaringey.org.uk)

<https://en10ergy.org.uk/>

**En10ergy** was set up in 2009 to get solar on local roofs and it supports the Muswell Hill Sustainability Group to do Green education and events. The Community Energy sector is changing rapidly and En10ergy needs to keep up with new technologies and opportunities. It hopes to refresh and reinforce the management and Board.

**En10ergy needs:** help to work with potential building hosts, fulfil legal responsibilities and update the web site. Contact [info@en10ergy.org.uk](mailto:info@en10ergy.org.uk)

## Why?

The **National Emergency Briefing** on the climate and nature crisis was held on November 27, 2025, at the (Methodist) Westminster **Central Hall in London** where experts briefed 850–1,250 attendees, including MPs, peers, and leaders, on urgent environmental, security, and economic risks facing the UK. It focused on food, health, national security, and economic impacts. Info here:

<https://www.nebriefing.org/> and Chris Packham's [National Emergency Briefing](#) has a map tracking screenings of the summary.

A good 'Just have a Think' commentary is on YouTube at <https://youtu.be/8sa7uh192r0>

The **National Security Assessment** was supposed to be released as a Joint Intelligence Committee assessment in November, but No. 10 blocked it. This 14-pager was released on 20 January b/c of a FOIA request. [National security assessment - global biodiversity loss ecosystem collapse and national security](#)

**We need to avert the climate and nature crisis**
